

## Option 1: Wall-to-Wall Install

Installation Type: Shelf installed between two walls

Note: Shelf supported on both sides. Suitable for custom and standard size floating shelves

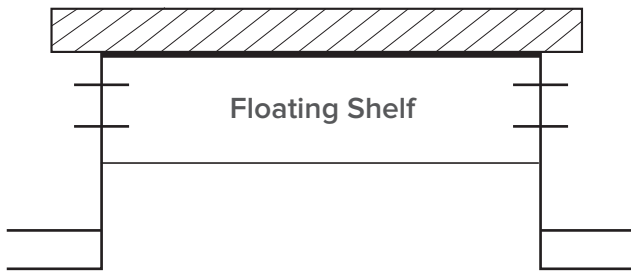

## Option 2: Corner Install

Installation Type: Shelf installed between a wall and cabinet

Note: Shelf supported on both sides. One side by a wall and one side by a cabinet. Suitable for custom and standard size floating shelves.

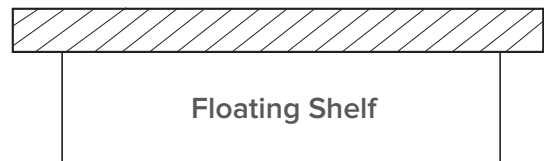

## Option 3: Cabinet-to-Cabinet Install

Installation Type: Shelf installed between two cabinets

Note: Shelf supported on both sides. Suitable for Custom and Standard size floating shelves.

## Option 4: Exposed Ends Install

Installation Type: Shelf installed with exposed ends

Note: Shelf does NOT have any support on either end. Not suitable for custom size floating shelves.

*Important: Custom-sized shelves DO NOT come with an internal bracket system. Therefore, they cannot be installed in an Exposed End Configuration (where the shelf is only supported at the back wall with no cabinetry or walls on either side). Exposed Ends installs are only suitable for 700mm or 1300mm shelves, that include the bracket system.*

Ensure shelf is securely fixed into wall studs or appropriate wall anchors. For full installation guidance, please refer to the Laundry Installation Instructions available at [newtech.co.nz](http://newtech.co.nz)
